- **Programming**

PHP, JavaScript

- **Framework**

Laravel, Next.js, Vue.js,
React.js

- **Databases**

MySQL, PostgreSQL

- **DevOps & Cloud**

Digital Ocean Cloud,
ConTabo cPanel/WHM

- **Version Control & Tools**

Git, GitHub, Jira, SonarQube

ACTIVITIES

- Digital Content Creator
- Programming Club
- Graphics

COURSES

- Secure Coding – Secure application development
- Excel Essentials for Workplace Productivity

LANGUAGE

- Bangla
- English
- Hindi

PROFILE

Dedicated Software Engineer with a focus on scalable web applications, fintech innovations, and workflow enhancement. I excel in crafting and developing scalable web applications that boost organizational efficiency. With a proven history of integrating technologies, streamlining workflows, and providing impactful digital solutions, I ensure high performance and a smooth user experience.

WORK EXPERIENCE

- **Softrobotics Bangladesh LTD**

Senior Software Engineer (Team Lead)

Nov 2023 – Present

- **Payment Gateway Solutions:** Designed and developed secure, scalable payment integrations for the Turkish fintech market, increasing transaction reliability.
- **Error Mapping & Reliability:** Reduced transaction failures by 15-20% through advanced error mapping across multiple providers and optimizing big data environments.
- **Engagement Systems:** Built dynamic cashback and loyalty modules, improving user retention rates and engagement.
- **Team Leadership & Collaboration** – Led a technical team using Jira for sprint planning, ensuring 100% on-time delivery of complex fintech features.

- **Dhaka Jacos**

Software Engineer

Dec 2021 – Oct 2023

- **Workflow Optimization:** Engineered requisition workflows across multiple branches, reducing manual approval time by 30% through authorized digital edits.
- **Procurement Efficiency:** Facilitated market surveys and supplier coordination, enabling data-driven procurement decisions for better cost management.
- **Inventory Control:** Implemented full-stack inventory functions including stock transfers and damage tracking, ensuring 99% accuracy in stock reporting.

- **Skill-Based IT (SBIT)**

Software Engineer

May 2018 – Nov 2021

- **Multivendor E-commerce System** – Engineered a scalable multi-vendor e-commerce platform supporting multi-branch operations, with advanced requisition workflows (branch-level requests, authorized edits, approval-based purchase order generation), seamless vendor-procurement coordination, and rider-based order tracking.
- **Inventory & POS Management System** – Delivered robust inventory functionality for retail and warehouse operations. Covered key modules like purchase receiving, stock transfers, product issuance, damage/loss tracking, and real-time stock adjustments—ensuring accurate reporting and smooth point-of-sale integration.
- **Courier Ecosystem for Nationwide Logistics**—a courier management system tailored to Bangladesh's logistics flow, similar to Steadfast. Supported merchant onboarding, parcel booking, pickup and delivery assignments, tracking updates, and status-based workflows integrated with the e-commerce system to streamline last-mile delivery.
